www.hdm services.com.au

There are many risks to the data on your computer.

Hardware failure, theft, virus infection, even property fires are threats to the data on your pc.

HDM provides a unique service to protect the data on your computer.

Our service is cost effective and reliable.

Our service provides you with a brand new external hard drive unit to store a backup copy of your data on.

We also provide -

- Delivery and pickup service
- Rotation cycle of your choice
- Secure local off-site storage

We deliver your dedicated Hard Drive Unit

Simply transfer, update or recover your data with your Hard Drive Unit.

- Easy plug and play operation
- USB connection
- No new software required
- No Internet required

We pick up your Hard Drive Unit

HDM advises you by e-mail when the Hard Drive Unit is due for updating. Delivery is scheduled.

When required contact us for immediate return of Hard Drive Unit to restore your data.

Your personal Hard Drive Unit is stored in our Data Vault and held in hibernation in a safe and climate controlled environment awaiting rotation or retrieval.
